

HYCU™

The Only Backup and
Recovery Purpose-built
for Nutanix

www.comtradesoftware.com

HYCU makes Data Protection for Nutanix as **easy as 1, 2, 3, 4**

Leverage the power of Nutanix with ease

100% application focus

No more partially backed-up applications. HYCU makes your VMs transparent by auto discovering your applications. Get application-aware, granular, wizard-driven restores.

Natively integrated

Eliminate complexity and silos by making data protection a natural extension to Nutanix AOS. HYCU's familiar Nutanix look and feel makes it a breeze to use. Plus, you'll maximize Nutanix by using its storage as a backup target.

Storage level snapshots

HYCU leverages the power of Nutanix Storage-level snapshots via the v3 API to deliver no-impact backup and rapid recovery. And uses Nutanix change block tracking APIs to deliver the best RPO with incremental forever strategy.

“

“HYCU’s approach, built on Comtrade’s long pedigree in data protection, combines elegant ease-of-use with rich hypervisor integration in such a way that organizations looking at Nutanix should seriously consider HYCU as part of their data protection strategy.”

- Jason Buffington, Principal Analyst, ESG
